Jakarta

I'm Josua Gaolus Nainggolan, an SAP Basis with experience in system administration, configuration, and maintenance to ensure optimal SAP performance. I love diving into new technologies and constantly challenging myself to learn and grow. Beyond work, I'm passionate about solving problems through technology and exploring innovative ways to make SAP systems more efficient and reliable.

Work Experiences

PT Soltius Indonesia - Jakarta

Oct 2023 - Present

IT Consultant SAP Basis

PT Soltius Indonesia is an information technology consulting company, focusing on implementing SAP solutions and digital transformation for businesses. As a subsidiary of Metrodata, I work as a specialist in SAP, assisting companies in managing and optimizing their SAP systems to ensure efficiency.

- Create a Virtual Machine as a container for installing the SUSE Linux OS on the Soltius server.
- Install SUSE Linux OS, ensuring proper storage mapping and directory structuring for SAP installation.
- Prepare necessary system resources and install SAP on the SUSE Linux OS.
- Deploy Software Update Manager (SUM) for upgrading, updating, and migrating SAP systems.
- Configure essential system settings such as RFC connections and integration settings.
- Collaborate with the functional team to troubleshoot and optimize system performance.
- Implement SAP Notes to resolve issues encountered by functional consultants across different SAP modules.
- Enable SAP Fiori for users, allowing them to access SAP via web browsers with a modern UI and intuitive UX design.
- Develop and maintain Fiori catalogs to simplify user navigation and provide easier access to frequently used transaction codes.
- Manage Transport Requests (TR) to move configurations and developments from the development system to the production environment.
- Ensure transports execute without errors and check for dependencies between packages.
- Create and manage users in SAP.
- Assign roles and authorizations based on access requirements and job functions.
- Ensure secure access by defining role-based permissions.
- Conduct security audits and ensure system compliance with security standards.
- Conduct SAP performance checks and report findings.
- Perform troubleshooting to identify and resolve issues in the SAP development environment.
- Analyze SAP memory usage and VMware resource allocation to optimize system efficiency.

Education Level

Institut Teknologi Del - Laguboti, Toba Samosir, Sumatera Utara

Aug 2019 - Sep 2023

Bachelor of Informatics, 3.33/4.00

Organisational Experience

Fresh Graduate Academy

Mar 2023 - Apr 2023

UI/UX Designer

An event held by Kominfo to train fresh graduates or someone who wants to work to develop their skills

- During a UI/UX Designer bootcamp, participants learn user research, wireframing, prototyping, usability testing, UI design principles, design systems, accessibility, microinteractions, and developer collaboration using tools like Figma, Adobe XD, and Sketch, while building real-world projects and portfolios.
